

SYNKRO

In a blink, you're in sync

A mobile-first digital campus ID platform that replaces plastic cards with secure, integrated mobile credentials combining ID, payments, and safety in one app.

The Problem with Plastic

Theft & Loss

Stolen cards grant immediate campus access and expose sensitive student data and financial accounts.

Physical Degradation

Magnetic strips and chips fail from wear, causing unreliable service and unnecessary lockouts.

Forgetting Factor

Students tend to forget their primary thing of their campus life and have immediate denial of service.

Environmental Impact

Over 50M plastic cards produced annually non-recyclable PVC that takes centuries to degrade.

Market Opportunity

Market Size Breakdown

Market Size

- **TAM:** 4,000+ U.S. universities, ~20M students
- **SAM:** Universities using campus card systems, ~15M students
- **SOM:** 50–100 universities adopting digital ID systems

Market Drivers

- Mobile-first student behavior
- Digital campus transformation
- Sustainability initiatives
- Rising plastic card costs

Market Growth Trajectory

The education technology and digital identity sectors are experiencing significant expansion, with a projected CAGR of 14.6%. This growth signals a massive shift toward mobile-first campus ecosystems, positioning SYNKRO to capture substantial market share as universities modernize.

\$14.2B

Electronic student card market size by 2033

14.6%

CAGR through 2033

900+

North American campuses with mobile ID support

50M+

Annual U.S. plastic student ID card production

Business Model & Financial Impact

SYNKRO drives scalable growth through a tiered B2B SaaS model that replaces costly legacy infrastructure with high-margin digital solutions.

Subscription (Primary)
\$3–\$8 per student/year
Scalable annual licensing based on enrollment.

Transaction Fees
1–2% per transaction
Leveraging high-volume campus spend.

Premium Modules
Custom Pricing
Advanced analytics & security add-ons.

Financial Value Proposition

Universities see immediate ROI by eliminating expensive plastic card production and administrative overhead.

- **Revenue Potential:** A 20,000 student university generates **\$60K–\$160K ARR** from subscriptions alone.
- **Cost Savings:** Eliminate physical card replacement costs (approx. \$5/card).
- **Break-even:** Typically achieved within the first semester of deployment.

Why Now?

Mobile ID Adoption

Mobile student IDs gaining fast adoption; usage on phones has surpassed plastic in some ecosystems.

Security Focus

Campuses investing heavily in digital security, integrated access control, and faster emergency response.

Smart Campus Push

Universities buying cloud campus management and mobile apps for administration and student services.

Sustainability

Institutions face pressure to reduce PVC usage and waste from tens of millions of plastic cards.

SYNKRO Solution

The all-in-one digital campus card: ID + payments + safety, delivered as B2B SaaS to universities.

Secure Mobile ID

Replace physical campus IDs with secure mobile credentials using SSO authentication.

Integrated Payments

Manage balances, dining, and top-ups in the same app with real-time expense tracking.

Campus Safety

Emergency GPS sharing, alerts, and integrations with systems like LoboAlerts.

Product Features

Secure SSO Authentication

Single Sign-On with Microsoft Azure ensures secure, seamless access to campus systems.

Smart Assistant

AI-powered assistant helps students find campus resources like quiet study spaces and dining options.

Expense Tracking

Real-time balance updates, transaction history, and easy top-ups keep students informed.

Campus Safety

Live GPS sharing, emergency button connects directly to campus safety

Technology Stack

Flutter

Cross-platform mobile development for iOS and Android

Firebase

Authentication, Firestore database, and cloud services

Python

Backend services and API development

AWS

Cloud infrastructure and scalable hosting

Our Team

The SYNKRO team brings a unique blend of technical mastery and strategic business acumen, perfectly positioned to solve the challenges of campus connectivity. As active students themselves, we don't just build for users—we build for their own community.

Technical Core

Ankit Devarapalli & Vaibhav Annapragada

Leading the development with a mobile-first mindset and deep expertise in scalable architecture.

Strategic Vision

Abhinav Punnakuzhy

Driving the go-to-market strategy, user growth, and organizational operations to ensure SYNKRO's success.

Why We Are Built to Win

Campus Insiders

We experience the pain points daily. We understand the student lifecycle, campus bottlenecks, and the urgent need for a better mobile solution.

Unmatched Agility

As undergraduates, we possess the energy to iterate at lightning speed, testing features in real-time and adapting to user feedback instantly.

Synergistic Execution

By merging rigorous technical development with grounded business strategy, we ensure SYNKRO isn't just a great product, but a sustainable, high-impact venture.

Let's Sync the Campus

SYNKRO is more than a digital ID; it is the operating system for the next generation of campus life. By consolidating fragmented services into one seamless mobile experience, we are empowering 20 million students to connect, transact, and thrive.

The Opportunity Ahead

\$262B Market

Capturing the rapid expansion of higher-ed technology by 2034.

4,000+ Campuses

A nationwide footprint ready for digital transformation.

Join Us

We are building the infrastructure for the future of education. Let's discuss how we can scale SYNKRO together.

Thank You

Together, let's build the future of connected campuses.
